

ENVIRONMENTAL POLICY

Customers: enter into a dialogue about customer requirements, and at the same time assure that our products and services do not have an unnecessary impact on the environment.

Employees and suppliers: contribute to ongoing improvements and preventive actions in the production and on environmental initiatives in general.

Management: ensure innovation of continuous improvements and preventive actions within environmental issues. Display openness towards the public and employees on environmental considerations. Ensure that work is carried out under existing environmental laws.

Results: Environmental results are made in consideration of technical and scientific development.

Community: enter into a dialogue with neighbours and other local stakeholders.
